

Construction Update – 29th January 2018

This notification is regarding the upcoming excavation works on the northern side of Innovation Plaza.

Temporary fencing for Stage 1 will be installed tomorrow, then we will commence saw cutting and excavation works in the area. The work is scheduled to commence on Tuesday 30th January and be completed by Friday 15th February.

As shown in the staging plan on the following pages, works will be conducted along the northern side of the National Innovation Centre (NIC). We will be maintaining at least 2m of fire egress at all times through the duration of the works.

The same time restrictions (7:30 - 9:30am) for noisy works in Innovation Plaza will be applied while we carry out works on the northern side of NIC.

We can also confirm that access to car parking and the garbage area will be maintained at all times.

If you have any questions or concerns, or if you require more information, please contact me at atp.communications@mirvac.com or call 1800 870 549.

Kind regards, Kim
